

LLM Frontend Generation Master Prompts

General UI Generation Prompt

Create a complete, production-ready frontend page using HTML, CSS, and JS in a single file.
Follow these requirements:

1. Use modern design principles: spacing hierarchy, UI balance, clean typography.
2. Include responsive layout for all screen sizes.
3. Use adaptive grids, flex layouts, and avoid fixed pixel widths unless needed.
4. Style must follow a premium dark-themed aesthetic with radial soft glows, glassmorphism, shadows, and rounded corners.
5. Use Google Font "Outfit".
6. Add hover animation, elevation, smooth easing, and micro-interactions.
7. Keep code readable, modular, and structured.
8. Ensure no layout breaking or overflow issues.
9. Include placeholder text/images where necessary.
10. Automatically add polished final touches without needing extra instructions.

Output: one complete HTML file.

Rider Dashboard Prompt

Create a full Rider Dashboard in HTML/CSS/JS with the following:

- Deep luxury gradient theme (navy–teal–black).
- Large centered map (65–70% width, 70vh height).
- Right side control panel (380–440px width) with:
 - * Location search (pickup, drop) with Google Places Autocomplete.
 - * Quick actions.
 - * Active ride section.
 - * Upcoming rides.
- Ride types displayed below the map in an evenly spaced horizontal row with glass icons (Car, Auto, Bike).
- Add active highlight glow on selection.
- Add responsive behavior and smooth animations.

Output: a polished, deployable HTML page.

Driver Dashboard Prompt

Create a Driver Dashboard with:

- Map occupying left 55–60% of screen.
- Right panel showing:
 - * Driver status (Online/Offline).
 - * Current trip card.
 - * Earnings summary.
 - * Ride requests list (scrollable).
- Use glass panels, modern shadows, smooth transitions.

- Ensure mobile-friendly collapse behavior.
- Output: complete HTML/CSS/JS.

Admin Panel Prompt

Create an Admin Panel with:

- Sidebar navigation (Users, Drivers, Rides, Payments, Analytics).
- Top bar with search + profile.
- Main content area displaying analytics cards, tables, and charts.
- Use responsive grid layout.
- Style with dark-premium dashboard look.

Output: full HTML/CSS/JS.

Live Ride Tracking Prompt

Create a Live Ride Tracking screen:

- Full-width map showing driver + rider markers.
- Sticky bottom card showing ETA, distance, vehicle type.
- Floating buttons: recenter map, contact driver, cancel ride.
- Use animated route polyline placeholder.

Output: full page HTML/CSS/JS.

Booking Overlay Prompt

Create a booking overlay like Uber:

- Bottom sheet that slides up from bottom.
- Includes vehicle options, price estimates, ETA, driver availability.
- Dims background map.
- Smooth pan and drag animation.

Output: HTML/CSS/JS.

Profile & Settings Prompt

Create a Profile page:

- Profile header with avatar, name, rating.
- Preferences card (theme, privacy, notifications).
- Saved places section.
- Payment methods section.
- Responsive panels with glass styling.

Output: complete HTML/CSS/JS.

Wallet / Payments Prompt

Create a Wallet page:

- Wallet balance header.
- Transaction history list.
- Add money button with modal.
- Payment methods management.

Output: complete HTML/CSS/JS.

Support / Help Prompt

Create a Help & Support page:

- FAQ accordion.
- Chat support button.
- Call support section.
- Recent tickets list.

Output: HTML/CSS/JS.

Trips History Prompt

Create a Past Trips page:

- List of previous rides with date, amount, vehicle type.
- Click to expand trip details.
- Download invoice button.

Output: full HTML/CSS/JS.
